Drinking water wells in fire areas should be protected

Lessons from Carlton Complex

Opening Market Day - June 13 2nd Annual Farm-to-Table Dinner - July 25th New Vendors Always Welcome! Call 307-699-4649 or davenportmarket.com for more info

3223 N. Marguerite Rd. davenportmarket.com Wednesday, 2pm-7pm 6/13/15 - 9/26/15

spections

Homeowners affected by wildfire are encouraged to inspect their drinking-water wells their investment.

Forest fires can melt aluminum and plastic well caps, Fire of 2014. leaving the well exposed to en-

fire prompts urgency for in- vironmental hazards. Uncapped wells can fill with rocks, mud and debris rendering the well unusable

> The Washington Department were learned about the impacts of forest fires on wells after the devastating Carlton Complex

509-928-3995

24411 E Joseph Ave, Otis Orchards, WA

marlewormgrowers.com

"The intense rain storms that followed the Carlton Complex Fire caused mudslides in burned areas, destroying a number of wells that could not be repaired or properly decommissioned," explained Avery Richardson, Ecology's well coordinator in the Central Regional Office.

> Wells with tight fitting caps mostly were undamaged by the debris flows, as the materials largely passed over them.

How to protect your well

· Inspect your well as soon as you can safely return to your property.

• Check to see if your well cap is still in place. Make sure it is tightly bolted and the vent hole or conduit hole is plugged. This helps prevent insects, ash or debris from entering your well.

• If your well cap was destroyed, seek advice from a local well driller or pump installer to purchase another one. Installation is generally simple.

· While these professionals are busy at this time, it is imperative that you get your well capped as soon as possible.

Other information is available on the state Department of Health's drinking water and wildfire webpage: http://www. doh.wa.gov/CommunityandEnvironment/DrinkingWater/ Wildfires2015

Editor's Note: We are proud to include Kathleen Kiefer as a contributing writer this issue. Kathleen is a prolific writer, photographer, filmmaker and long time Soap Lake resident.

Her photographs have appeared in annual reports, calendars, websites, posters, cards, in books, film, advertsing.

She is the author of numerous articles for the hydropower industry publications, annual reports, documentary film scripts, regional publications, and local newspapers.

Kathleen has completed numerous documentaries, shorts and commercials. Films have won silver and bronze Telly Awards, gold AVA awards, Telly Peoples Choice, and a Bullitt Foundation Icicle Prize.

VALERIE VISSIA, ON LIVING IN HUCKLEBERRY COUNTRY: "It's the people and not just who they are but what they do for each other. The term "Neighbor" is real here and I'm very fortunate to experience it everyday. "Hi Neighbor" means something here. If you live here you don't need an explanation." # calluslucky (from our Facebook page at facebook.com/thehuckleberrypress)
